

KHUSHBOO TRIVEDI

Senior Software Engineer | Python | Django & REST APIs | 5+ Years Experience | AI/ML Enthusiast

+91-9607291138 | khushbousaha@gmail.com | Pune, India

PROFESSIONAL SUMMARY

Results-driven Senior Software Engineer with 5+ years of experience building data automation systems, and pricing intelligence platforms. Delivered 7+ end-to-end automation projects for enterprise clients including Dell, consistently reducing manual effort by 60–80%. Expert in Python, MySQL, Django, and REST APIs. Multiple Quarterly Performance Award winner for high-impact automation contributions.

TECHNICAL SKILLS

Languages: Python, SQL

Frameworks: Django, Django REST Framework

Data Engineering: Data Extraction & Transformation, Web Scraping, Data Validation

Libraries: Pandas, BeautifulSoup, Requests, OpenPyXL

Databases: MySQL

Tools: PyCharm, VS Code, Jupyter Notebook, GitHub

Methodologies: Agile, Scrum, Sprint Planning, QA & Data Quality Assurance

PROFESSIONAL EXPERIENCE

Senior Software Engineer | PyxTech Pvt. Ltd., Pune

October 2020 – Present

- Designed and deployed end-to-end automated data pipelines ingesting data from 10+ heterogeneous sources, reducing manual data processing effort by ~70% across teams — recognized with multiple Quarterly Performance Awards.
- Built web scraping frameworks (BeautifulSoup, Requests) collecting real-time pricing and product data from 10+ websites, directly powering the Pyx FMV pricing intelligence platform used by global secondary tech markets.
- Engineered ETL workflows converting raw, unstructured data into standardized JSON and structured formats; served as the primary data feed for 3+ internal platforms and enterprise client systems.
- Developed automated anomaly detection and monitoring system (Python, MySQL) that proactively flagged data quality issues, cutting downstream incident resolution time by ~50%.
- Automated Dell's Dynamic Burn Slot Allocation (DBSA) data pipelines — fetching, cleaning, classifying, and uploading large operational datasets — eliminating hours of daily manual effort for Dell's operations team.
- Optimized complex MySQL queries with improved indexing strategies, achieving measurable query performance gains across datasets with millions of rows.
- Extracted and transformed structured data from PDF files and CSV sources into standardized JSON formats, handling complex document parsing use cases for 2+ enterprise clients.
- Collaborated in Agile sprints across 7+ concurrent projects, consistently delivering features on schedule with zero critical production incidents attributed to data pipeline failures.

ACHIEVEMENTS & RECOGNITION

- Quarterly Performance Award — Won multiple times at PyxTech for outstanding automation contributions that significantly reduced manual workload across departments.
- Delivered 7+ end-to-end data automation projects for enterprise clients including Dell, managing multiple high-priority deliverables simultaneously.

- Led automation initiative that reduced a complex multi-team manual workflow to a fully automated pipeline, saving an estimated 15+ hours/week in manual effort.

KEY PROJECTS

- Pyx FMV & Pricing Intelligence Platform — Built data ingestion, matching, and validation pipelines (Pyx Miner, Sorter, Validator) powering real-time global secondary tech market pricing for 10+ source websites.
- Dell DBSA Automation — Automated burn slot allocation data pipelines (fetch → clean → classify → upload), eliminating daily manual processing and significantly reducing Dell operations team turnaround time.
- Data Scanner (Health Monitoring) — Built anomaly detection system using Python, Regex, OpenPyXL & MySQL; automated stakeholder alerts reduced issue resolution time by ~50%.
- MVBA — Developed PDF data extraction and CSV-to-JSON transformation scripts handling complex enterprise document parsing use cases for client reporting workflows.
- Dell GCS / SKI / DTD Automation — Delivered data processing, sales ingestion, and workflow monitoring scripts for Dell and internal teams, consolidating partner workflows and automating operational reporting.
- Pyx Quote Pro — Automated BOM extraction for asset IDs from Teradata and Quality tool, eliminating manual data retrieval and accelerating quote generation turnaround.

EDUCATION

Master of Engineering (M.E.) — Information Technology

Sant Gadge Baba Amravati (SGBA) University, Amravati
